PROFILE

I am finishing a Computer Information Systems degree at Mount Royal University this fall, majoring in software development and minoring in supply chain. The pairing is deliberate: I spend my days running the back of house for a retail store, and I build the software that the same kind of operation depends on.

EXPERIENCE

May 2026 – present

Remote

E-commerce Platform Support

[Kit and Ace](#)

- Helped build oneship.ca, a multi-carrier shipping platform for Canadian merchants, working alongside the development team on the site itself.
- Ran diagnostics across the platform — user experience, technical, accessibility, SEO and security — producing around thirty-five rated findings, each paired with a recommended fix.
- Took the lead on inventory across all 14 Kit and Ace locations: introduced a daily discrepancy tracker every store fills in, and reconciled the adjustments myself each day until system counts stopped drifting from the floor.

Feb 2024 – present

Calgary, AB

Retail Operational Lead

[Kit and Ace](#)

- Run back of house for a team of 10: inbound shipments, inventory, restock and the logistics that keep the floor stocked.
- Rebuilt how back of house is organised — every item labelled and sorted into boxes and zoned sections — so staff find stock immediately instead of searching for it.
- Before that, stock sat in unsorted piles and staff dug through them to find a size; now they walk straight to it.
- Run special projects end to end, delivering them within scope, time and budget.
- Manage resource allocation and budget, and identify process improvements that reduce operating costs.

Jul 2019 – Jul 2023

Calgary, AB

Retail Sales Associate

[Nordstrom](#)

- Curated wardrobes for a large repeat clientele against seasonal trends and individual budgets.
- Built virtual vision boards with clients — the first thing that got me presenting a designed proposal to somebody and having to defend it.
- Maintained displays and championed promotional lines to lift visibility and sales.

May 2020 – Jul 2020
Calgary, AB

Business Development Representative
Kmoon Inc

- Wrote detailed client proposals and presented outcomes and financials to board members.
- Analysed customer reviews and survey responses into a trend list that became the basis of a data project, then used it to propose fixes.
- Ran outreach campaigns to previous clients and handled the business's data entry in Excel.

SELECTED PROJECTS

DJ Mishoo djmishoo.ca

Design, build and deploy

- Bilingual English and Arabic booking site with an in-browser generator for agreements, invoices and receipts. No framework, no build step.

JavaScript · CSS · English and Arabic · GitHub Pages · CSP

OneShip oneship.ca

Build collaboration and site audit

- Multi-carrier shipping platform for Canadian merchants. Worked on the build with the development team, then audited UX, technical, accessibility, SEO and security — around thirty-five rated findings.

E-commerce · Inventory flows · UX audit · WCAG · SEO

Toy Company Storefront

University project · Java

- Java desktop application with a full graphical interface for browsing and ordering stock. University coursework.

Java · OOP · GUI

Royal Bake michomimi.github.io/royal-bake

Design and build

- Restaurant site with a 104-dish menu across ten categories, English and Arabic, per-size pricing and an order cart.

JavaScript · CSS · English and Arabic · GitHub Pages

SKILLS

Languages: JavaScript, TypeScript, Java, HTML, CSS, SQL, Python

Front end: React, Bootstrap, Responsive UI, Accessibility, Web performance

Back end and systems: Node.js, MySQL, Oracle, Networking infrastructure, Linux

E-commerce: Shopify, Order and inventory flows, Payments, Platform support

Tools: Git, GitHub Actions, VS Code, Figma, Vercel

EDUCATION

2020 – Fall 2026

Bachelor of Computer Information Systems
Mount Royal University · Calgary, AB

- Major in Software Development, minor in Supply Chain.
